

NOW YOU CAN CYCLE YEAR 'ROUND ... in snow or sand with the new **CYCLE SNO-GO**

Great New Sport—It adds a new dimension to motorcycling. Now you can roam the back country even in winter weather, to hunt, to get to your cabin or for just plain pleasure. Terrific for towing the youngsters on sled, toboggan or skis. Pretty soon there'll be competition events because SNO-GO is a real goer... up to 20 mph with a 200 cc motorcycle! Can use with cycles from 50 cc.

Fits Most Lightweights—Whether it's a Triumph Mountain Cub, Honda, Yamaha or Suzuki, CYCLE SNO-GO is easily adapted. The conversion kit consists of tractors that replace the back wheel and skis that slip on the front for traction in the snowy stuff. When it comes to getting around in loose or desert sand you need only the tractors.

Easy Installation—Shouldn't take you more than 30 to 40 minutes and you're ready for a new and exhilarating experience—motorcycling in the snow. If you have a lightweight or are about to buy one, this accessory should be part of the deal. That's because it adds so much fun and utility, you'll want to be first on the slopes and ready-to-go with CYCLE SNO-GO.

SOLD ONLY THROUGH MOTORCYCLE DEALERS
